

Creating a Metric View Using the IITB Catalog

Follow this guide to generate a metric view in Databricks using the iitb catalog. You will learn how to navigate your workspace and run the necessary cells to set up your analytics project successfully.

1 Click "Workspace"

The screenshot shows the Databricks workspace interface. The left sidebar contains navigation options: Home, Workspace (highlighted with an orange circle), Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, and AI Gateway (Beta). The main workspace area shows the 'bharatbricksiitb' workspace with a search bar and filters for Type, Owner, and Last modified. A table lists the contents of the workspace:

Name	Type	Owner	Created at
.databricks	Folder	user_9501cd52	Mar 28, 2026, 0...
02-data-transformation	Folder	user_9501cd52	Mar 28, 2026, 0...
05-iitb-junta-analytics-genie	Folder	user_9501cd52	Mar 28, 2026, 0...
06-iitb-baap-agent	Folder	user_9501cd52	Mar 28, 2026, 0...
instructions	Folder	user_9501cd52	Mar 28, 2026, 0...
raw_data	Folder	user_9501cd52	Mar 28, 2026, 0...
.gitignore	File	user_9501cd52	Mar 28, 2026, 0...
01-data-ingestion	Notebook	user_9501cd52	Mar 28, 2026, 0...
03-metric-view	Notebook	user_9501cd52	Mar 28, 2026, 0...
04-deploy-dashboard.py	File	user_9501cd52	Mar 28, 2026, 0...
04-life-at-iit-bombay	Dashboard	user_9501cd52	Mar 28, 2026, 0...
README.md	File	user_9501cd52	Mar 28, 2026, 0...
setup.py	File	user_9501cd52	Mar 28, 2026, 0...

2 Click "bharatbricksiitb"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Home, Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, and AI Gateway (Beta). The main area displays the 'Workspace > Users > visheshh.arya87@gmail.com' view. A search bar and filters for Type, Owner, and Last modified are present. A table lists workspace items:

Name	Type	Owner	Created at
Drafts	Folder	user_9501cd52	Mar 28, 2026, 0...
bakehouse	Folder	user_9501cd52	Sep 04, 2025, 10...
bharatbricksiitb	Git folder	user_9501cd52	Mar 28, 2026, 0...
secrets	File	user_9501cd52	Oct 24, 2025, 08...

The 'bharatbricksiitb' entry is highlighted with an orange circle. Below the table, there are tabs for 'main' and a 'Share' button.

3 Click "03-metric-view"

The screenshot shows the Databricks workspace interface with the '03-metric-view' Notebook selected. The left sidebar is the same as in the previous screenshot. The main area displays the 'Workspace > Shared with me > Workspace' view. A search bar and filters for Type, Owner, and Last modified are present. A table lists workspace items:

Name	Type	Owner	Created at
.databricks	Folder	user_9501cd52	Mar 28, 2026, 0...
02-data-transformation	Folder	user_9501cd52	Mar 28, 2026, 0...
05-iitb-junta-analytics-genie	Folder	user_9501cd52	Mar 28, 2026, 0...
06-iitb-baap-agent	Folder	user_9501cd52	Mar 28, 2026, 0...
instructions	Folder	user_9501cd52	Mar 28, 2026, 0...
raw_data	Folder	user_9501cd52	Mar 28, 2026, 0...
.gitignore	File	user_9501cd52	Mar 28, 2026, 0...
01-data-ingestion	Notebook	user_9501cd52	Mar 28, 2026, 0...
03-metric-view	Notebook	user_9501cd52	Mar 28, 2026, 0...
04-deploy-dashboard.py	File	user_9501cd52	Mar 28, 2026, 0...
04-life-at-iit-bombay	Dashboard	user_9501cd52	Mar 28, 2026, 0...
README.md	File	user_9501cd52	Mar 28, 2026, 0...
setup.py	File	user_9501cd52	Mar 28, 2026, 0...

The '03-metric-view' entry is highlighted with an orange circle. Below the table, there are tabs for 'main' and a 'Share' button.

4 Click this icon.

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Home, Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, and SQL Warehouses. The main area displays a notebook titled '03-metric-view'. The notebook content includes a title 'Metric View: IITB Subreddit Metrics', a description, configuration instructions, prerequisites, and two code blocks. The first code block sets up widget inputs for catalog and schema. The second code block is a SQL query to create a metric view. An orange circle in the top right corner of the notebook header highlights the 'workspace' icon.

5 Click here.

This screenshot shows the same Databricks workspace interface as before, but with the 'Genie Code' panel open on the right side. The notebook content is the same. The 'Genie Code' panel shows a 'Plan' section with a list of items: 'Score vs comments scatter plot revealing content engagement relationship', 'Most active commenters from the community', and 'Engagement metrics by topic showing which discussions drive participation'. Below this is a 'Trending Topics Page' section with items like 'Monthly post activity trends with content type breakdown', 'Hottest posts from last 30 days', and 'Trending topics showing recent community interests'. At the bottom of the panel is a 'Global Filters' section with items like 'Date range filter to analyze temporal patterns', 'Content type filter to focus on specific media', and 'Topic filter (currently being refined)'. An orange circle in the top right corner of the notebook header highlights the 'Genie Code' icon.

6 Click here.

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like 'Recents', 'Catalog', 'Jobs & Pipelines', 'Compute', 'Discover', 'Marketplace', 'SQL', 'SQL Editor', 'Queries', 'Dashboards', 'Genie', 'Alerts', 'Query History', 'SQL Warehouses', 'Data Engineering', 'Runs', 'Data Ingestion', 'AI/ML', 'Playground', 'AI Gateway', 'Experiments', 'Features', 'Models', and 'Serving'. The main area displays a notebook titled '03-metric-view'. The notebook content includes a title 'Metric View: IITB Subreddit Metrics', a description 'This notebook creates a metric view for analytics on r/iitbombay subreddit data.', configuration instructions, prerequisites, and two code blocks. The first code block is a Python script for widget setup, and the second is a SQL command to create or replace a view. The right sidebar shows the 'Genie Code' panel with a search bar and a dropdown menu.

Metric View: IITB Subreddit Metrics

This notebook creates a **metric view** for analytics on r/iitbombay subreddit data.

Configuration: Use the widget inputs at the top of this notebook to set your catalog and schema.

Prerequisites: Run 01-data-ingestion.ipynb and 02-data-transformation/ SQL files first.

```
1 # Widget setup - configure your catalog and schema
2 dbutils.widgets.text("catalog", "dbdemos_vishesh", "Catalog Name")
3 dbutils.widgets.text("schema", "bharat_bricks", "Schema Name")
4
5 catalog = dbutils.widgets.get("catalog")
6 schema = dbutils.widgets.get("schema")
7 print(f"Creating metric view in: {catalog}.{schema}")
```

```
1 %sql
2 CREATE OR REPLACE VIEW ${catalog}.${schema}.
```

Genie Code

Run multi-step data and AI tasks

Agent

Only use the agent with code and data you trust

7 Type "i want to use "iitb" catalog for creating this metric view. Enter"

8 Click "Accept all"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like 'Recents', 'Catalog', 'Jobs & Pipelines', 'Compute', 'Discover', 'Marketplace', 'SQL', 'SQL Editor', 'Queries', 'Dashboards', 'Genie', 'Alerts', 'Query History', 'SQL Warehouses', 'Data Engineering', 'Runs', 'Data Ingestion', 'AI/ML', 'Playground', 'AI Gateway', 'Experiments', 'Features', 'Models', and 'Serving'. The main area displays a notebook titled 'Metric View: IITB Subreddit Metrics'. The notebook content includes a description, configuration instructions, prerequisites, and a code cell (Cell 2) with Python code for setting up a metric view. The code is as follows:

```
1 # Widget setup - configure your catalog and schema
2 dbutils.widgets.text("catalog", "iitb", "Catalog Name")
3 dbutils.widgets.text("schema", "bharat_bricks", "Schema Name")
4
5 catalog = dbutils.widgets.get("catalog")
6 schema = dbutils.widgets.get("schema")
7 print(f"Creating metric view in: {catalog}. {schema}")
```

At the bottom right, there is a 'Run the cells' button and a '1 asset' section. The 'Accept all' button is highlighted with an orange circle.

9 Click "run the cells"

The screenshot shows the Databricks workspace interface, similar to the previous one. The main area displays the same notebook 'Metric View: IITB Subreddit Metrics'. The code cell (Cell 2) is visible, and the 'run the cells' button is highlighted with an orange circle.

10 Click "Ask every time"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Home, Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover, Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, and AI Gateway. The main workspace area displays a file tree on the left with folders like .databricks, 02-data-transformation, 05-iitb-junta-analytics-genie, 06-iitb-baap-agent, instructions, raw_data, .gitignore, 01-data-ingestion, 03-metric-view (selected), 04-deploy-dashboard.py, 04-life-at-iit-bombay, README.md, and setup.py. The central pane shows two code cells. Cell 2 contains Python code for setting up a catalog and schema. Cell 3 contains a SQL query to create or replace a view. On the right, the 'Genie Code' panel shows a 'run the cells' button and a dropdown menu with 'Ask every time' selected, highlighted by an orange circle. Other options in the dropdown are 'Skip' and 'Allow'.

11 Click "Always allow in current thread"

This screenshot is similar to the previous one, showing the same Databricks workspace with the same file tree and code cells. However, the 'Genie Code' panel on the right now shows a different state. The 'Ask every time' option is still selected in the dropdown, but it is now checked with a green checkmark. Below it, the option 'Always allow in current thread' is highlighted by an orange circle. The 'Allow' button is also visible. The 'run the cells' button is still present at the top of the panel.

12 Click "Run"

The screenshot shows the Databricks workspace interface. On the left, the sidebar contains navigation options like 'Catalog', 'Jobs & Pipelines', 'Compute', 'Discover', 'Marketplace', 'SQL', 'SQL Editor', 'Queries', 'Dashboards', 'Genie', 'Alerts', 'Query History', 'SQL Warehouses', 'Data Engineering', 'Runs', 'Data Ingestion', 'AI/ML', 'Playground', 'AI Gateway', 'Experiments', 'Features', 'Models', and 'Serving'. The main area displays a notebook with a Python cell (Cell 2) containing code to create a metric view. The right sidebar shows a 'run the cells' button, which is highlighted with an orange circle. Below it, a 'Review suggested' message indicates that the code uses 'CREATE OR REPLACE VIEW', which is considered unsafe. The 'Run' button is also highlighted with an orange circle.

```
3 dbutils.widgets.text("schema",  
4 "bharat_bricks", "Schema Name")  
5  
6 catalog = dbutils.widgets.get("catalog")  
7 schema = dbutils.widgets.get("schema")

Format: Percentage · 123456%

Synonyms: viral rate

Expression

```
SUM(CASE WHEN num_comments >= 20 OR post_score >= 100 THEN 1 ELSE 0 END) / NULLIF (COUNT(1), 0)
```

21 Click "Collapse"

The screenshot shows the Databricks Catalog interface. On the left, the 'Catalog' sidebar is visible, showing a tree structure of tables. The 'iitb_subreddit_metrics' table is selected. The main panel shows the 'Details' tab for this table. The 'Details' tab is highlighted with an orange circle. The page displays a definition of the table in YAML format.

Definition YAML

```
version: 1.1

source: |-
  SELECT
    p.post_id,
    p.title,
    p.body,
    p.author,
    p.created_at,
    p.score AS post_score,
    p.upvote_ratio,
    p.num_comments,
    p.flair,
    p.author_flair_text,
    p.is_self,
    p.is_video,
    ... 204 more lines
```
