

Create a Student Life Dashboard Using Genie Code

Learn how to leverage Genie Code to automate the creation of detailed dashboards based on your specific database schema. This guide shows you how to refine your data visualizations by organizing tabs and applying filters for cleaner, more impactful insights.

1 Click "Dashboards"

The screenshot displays the Genie Code interface. On the left, a sidebar contains various navigation links. The 'Dashboards' link is highlighted with an orange circle. The main area shows a 'Dashboards' page with a 'Featured' section displaying two sample dashboards: 'NYC Taxi Trip Analysis' and 'Retail Revenue & Supply Chain Overview'. Below these, there's a search bar 'Filter dashboards' and filters for 'All', 'Favorites', 'Popular', 'Last modified', and 'Owner'. A table lists dashboards with columns 'Name', 'Owner', and 'Last modified'. One dashboard, 'Workspace Usage Dashboard', is listed with owner 'user_9501cd52' and last modified 'Sep 4, 2025, 10:5...'. The right sidebar shows the 'Genie Code' logo and text: 'Run multi-step data and AI tasks', 'What can Genie Code do?', 'Run exploratory data analysis', and 'Find data'. At the bottom right is a chat input field with a placeholder '@ for objects, / for commands, ↑↓ for hist...' and an 'Agent' dropdown.

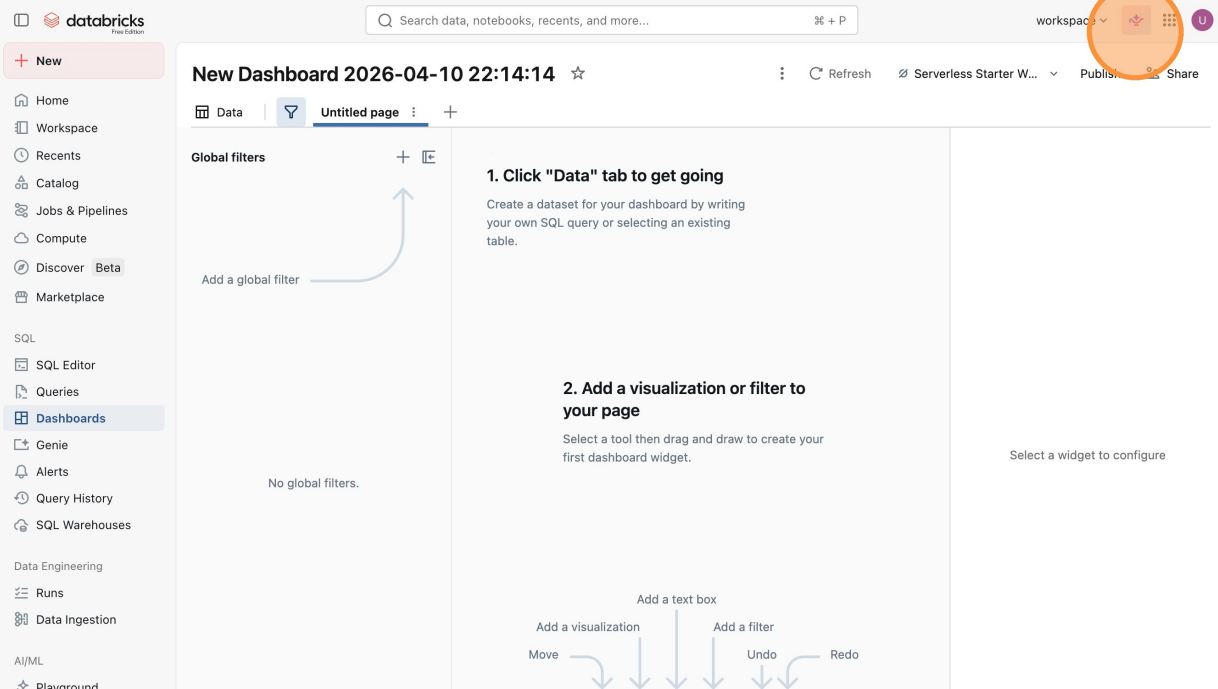

2 Click this button.

The screenshot shows the Databricks interface. On the left is a sidebar with navigation options like Home, Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards (highlighted), Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, and Disconnected. The main area is titled 'Dashboards' and features a search bar, a 'View samples gallery' button, and a 'Create dashboard' button with a dropdown arrow. This button is circled in orange. Below the 'Create dashboard' button are two featured dashboard samples: 'NYC Taxi Trip Analysis Sample' and 'Retail Revenue & Supply Chain Sample'. A table below shows a list of dashboards with columns for Name, Owner, and Last modified. The first entry is 'Workspace Usage Dashboard' owned by 'user_9501cd52' and last modified on 'Sep 4, 2025, 10:5...'. On the right side of the interface, there is a 'Genie Code' section with a logo and text: 'Run multi-step data and AI tasks', 'What can Genie Code do?', 'Run exploratory data analysis', and 'Find data'.

3 Click "Create dashboard"

This screenshot is similar to the previous one, but the 'Create dashboard' button's dropdown menu is open. The menu shows two options: 'Create dashboard' and 'Import dashboard from file'. The 'Create dashboard' option is circled in orange. The rest of the interface, including the sidebar, featured dashboard samples, and the dashboard list table, remains the same as in the previous screenshot.

4 Click "Genie Code"

5 Type "do in depth analysis of gold tables and metric view inside this schema - iitb.bharat_bricks and then create a dashboard exploring student's lives at iit bombay"

6 Click this icon.

The screenshot shows the Genie Code dashboard interface. On the left is a sidebar with navigation options: Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, AI Gateway (Beta), Experiments, Features, and Models. The main area is titled 'Untitled page' and contains two instructions: '1. Click "Data" tab to get going' and '2. Add a visualization or filter to your page'. Below these instructions is a toolbar with icons for 'Add a visualization', 'Add a text box', 'Add a filter', 'Move', 'Undo', and 'Redo'. On the right side, there is a 'Genie Code' section with a logo and the text 'Build your dashboard with AI'. Below this are buttons for 'Create a sample dashboard', 'Create a visualization', and 'Find a table'. At the bottom right, there is a chat window with a message: 'do in depth analysis of gold tables and metric view inside this schema - iitb.bharat_bricks and then create a dashboard exploring student's lives at iit bombay'. The chat window has a text input field and a button labeled 'Agent'.

7 Click "Ask every time"

The screenshot shows the Genie Code dashboard interface, similar to the previous one, but with additional content in the chat window. The main area still displays the same instructions and toolbar. The chat window on the right now shows a message: 'do in depth analysis of gold tables and metric view inside this schema - iitb.bharat_bricks and then create a dashboard exploring student's lives at iit bombay'. Below this message, there is a section titled 'Thoughts: The user wants me to:' followed by a list of actions: 'I'll analyze the gold tables and metric views in the iitb.bharat_bricks schema, then create a comprehensive dashboard about student life at IIT Bombay.', 'Found tables (5)', 'Thoughts: Good! I found several tables in...', 'Thoughts: Now I have a complete picture...', 'Found tables (5)', 'Read table structure iitb_gold_posts', 'Read table structure iitb_gold_comments', 'Thoughts: Perfect! I found a metric view:', and 'Renamed dashboard to "IIT Bombay Student Life Exploration"'. Below this list, there is a button labeled 'Adding metric view iitb_subreddi_me' and a dropdown menu with the option 'Ask every time' selected. There are also buttons for 'Skip' and 'Allow'. At the bottom of the chat window, there is a text input field and a button labeled 'Agent'.

8 Click "Always allow in current thread"

The screenshot shows the Genie AI interface. On the left is a sidebar with various tools like Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, AI Gateway (Beta), Experiments, Features, and Models. The main area is titled 'Untitled page' and has a 'Data' tab selected. It contains instructions for creating a dataset and adding visualizations or filters. A sidebar on the right shows a list of tables and a 'Adding metric view' dialog. The 'Always allow in current thread' button is highlighted in the dialog.

Global filters

1. Click "Data" tab to get going

Create a dataset for your dashboard by writing your own SQL query or selecting an existing table.

2. Add a visualization or filter to your page

Select a tool then drag and draw to create your first dashboard widget.

Adding metric view `iitb_subreddit_me`

9 Click here.

The screenshot shows the Genie AI interface with a dashboard. The dashboard has four main sections: 'Total Posts' (923), 'Total Comments' (9,183), 'Active Community Members' (693), and 'High Engagement Rate' (17.6%). Below these are two charts: 'Student Activity Over Time' (a line chart showing posts over time) and 'Discussion Topics (by Flair)' (a bar chart showing topics by flair). At the bottom are 'Content Type Distribution' (a pie chart showing post types) and 'Engagement Trends' (a line chart showing engagement over time). A sidebar on the right shows a list of tables and a 'Creating dataset from SQL' dialog. The 'Creating dataset from SQL' button is highlighted in the dialog.

10 Click "Always allow in current thread"

The dashboard displays the following data:

- Total Posts: 923
- Total Comments: 9,183
- Active Community Members: 693
- High Engagement Rate: 17.6%

Charts and Visualizations:

- Student Activity Over Time:** A line chart showing activity from Jan 1, 2020, to Jan 1, 2026. The y-axis represents Total Posts (0 to 300).
- Discussion Topics (by Flair):** A bar chart showing the number of posts for various flairs. The y-axis represents Total Posts (0 to 500).
- Content Type Distribution:** A pie chart showing the distribution of content types. The legend indicates: video (6.93%), image (6.93%), and text (6.93%).
- Engagement Trends:** A line chart showing engagement trends over time. The y-axis represents Avg Cont (0 to 40.0).

11 Click "Genie Code Input Box"

The dashboard displays the following data:

- Total Posts: 923
- Total Comments: 9,183
- Active Community Members: 693
- High Engagement Rate: 17.6%

Charts and Visualizations:

- Student Activity Over Time:** A line chart showing activity from Jan 1, 2020, to Jan 1, 2026. The y-axis represents Total Posts (0 to 300).
- Discussion Topics (by Flair):** A bar chart showing the number of posts for various flairs. The y-axis represents Total Posts (0 to 500).
- Content Type Distribution:** A pie chart showing the distribution of content types. The legend indicates: video (6.93%), image (6.93%), and text (6.93%).
- Engagement Trends:** A line chart showing engagement trends over time. The y-axis represents Avg Cont (0 to 40.0).

Chat Window:

- Content Types:** Text posts dominate (73%), with images, links, videos, and galleries making up the remainder
- Academic Cycles:** Spring semester sees the highest activity (595 posts), followed by autumn semester (289) and summer break (39)
- Student Communities:** While most authors don't display affiliations, Mechanical and Electrical departments, along with various hostels like H5 Penthouse and H2 Wild Ones, show active participation
- Engagement Trends:** Average post scores and comments have shown spikes, with notable engagement peaks in early 2026
- Popular Content:** Top posts include campus events like Techfest performances, cultural activities, campus wildlife sightings, and community discussions

The dashboard includes detailed tables showing the most popular posts (with scores reaching nearly 7,000) and most active contributors, providing a window into student interests, concerns, and campus culture at IIT Bombay.

12 Type "let's create different tabs for different sections **Enter Enter** also, there are a lot of untagged and unknown categories. let's filter those out **Enter**"

13 Type "move heading markdowns to the top on all tabs **Enter**"

14 Click "Overview"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Home, Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, and Diagrams. The main area displays a dashboard titled "IIT Bombay Student Life Explorer 2026-04-...". It has five tabs: Data, Overview (selected), Topics & Content, Community, and Popular Posts. The Overview tab shows a section titled "Most Popular Posts on r/iitbombay" with a description: "Explore the most engaging content from the IIT Bombay community - posts that resonated most with students through high scores and active discussions." Below this is a table with the following data:

Title
Well that pretty much sums it up.
Amazing person in Techfest!!
Illuminati Dance Crew at Techfest at IIT Bombay..!
Is it True guys ?
Tech Fest At IIT Bombay, Even They Perform Like IIT Level!!
IIT Bombay Hostel Mess...!
Another Ambedkar statue unveiled at IIT Bombay - thoughts?
IIT Bombay wali holi. Kisne kheli?
What's causing this in IITs?
caught
What do you guys make of this?
Eww

On the right side of the dashboard, there is a "Genie Code" panel with a blue callout box that says "move heading markdowns to the top on all tabs". The panel also contains a list of 7 steps and a summary of the changes made to the dashboard layout.

- **Overview** - Dashboard overview now appears at the very top (row 0), with the key metrics counters below it
- **Topics & Content** - Discussion topics overview moved to the top (row 0), followed by the topic analysis charts
- **Community** - Student communities overview moved to the top (row 0), before the community analytics
- **Popular Posts** - Already had its heading at the top

All tabs now have a consistent layout with contextual introductions at the top, making it easier for users to understand what each section contains as soon as they navigate to it.
