

How to Run Data Ingestion Notebooks Using AI Assistant

Learn how to use the AI assistant to automatically trigger data ingestion processes for your specific catalog and schema. This guide simplifies the workflow for analyzing data samples and managing notebook execution efficiently.

1 Click "Workspace"

The screenshot shows the Databricks workspace interface. On the left sidebar, the 'Workspace' tab is highlighted with an orange circle. The main content area displays a list of files and folders within the 'bharatbricksiitb' workspace. The table below represents the data shown in the screenshot:

Name	Type	Owner	Created at
.databricks	Folder	user_9501cd52	Apr 10, 2026, 07:...
02-data-transformation	Folder	user_9501cd52	Apr 10, 2026, 07:...
05-iitb-junta-analytics-genie	Folder	user_9501cd52	Apr 10, 2026, 07:...
06-iitb-baap-agent	Folder	user_9501cd52	Apr 10, 2026, 07:...
instructions	Folder	user_9501cd52	Apr 10, 2026, 07:...
raw_data	Folder	user_9501cd52	Apr 10, 2026, 07:...
.gitignore	File	user_9501cd52	Apr 10, 2026, 07:...
01-data-ingestion	Notebook	user_9501cd52	Apr 10, 2026, 07:...
03-metric-view	Notebook	user_9501cd52	Apr 10, 2026, 07:...
04-life-at-iit-bombay	Dashboard	user_9501cd52	Apr 10, 2026, 07:...
README.md	File	user_9501cd52	Apr 10, 2026, 07:...

2 Click "bharatbricksiitb"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Home, Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, and Playground. The main area displays the user profile for 'visheshh.arya87@gmail.com'. Below the profile, there's a table of items in the workspace. The 'bharatbricksiitb' folder is highlighted with an orange circle.

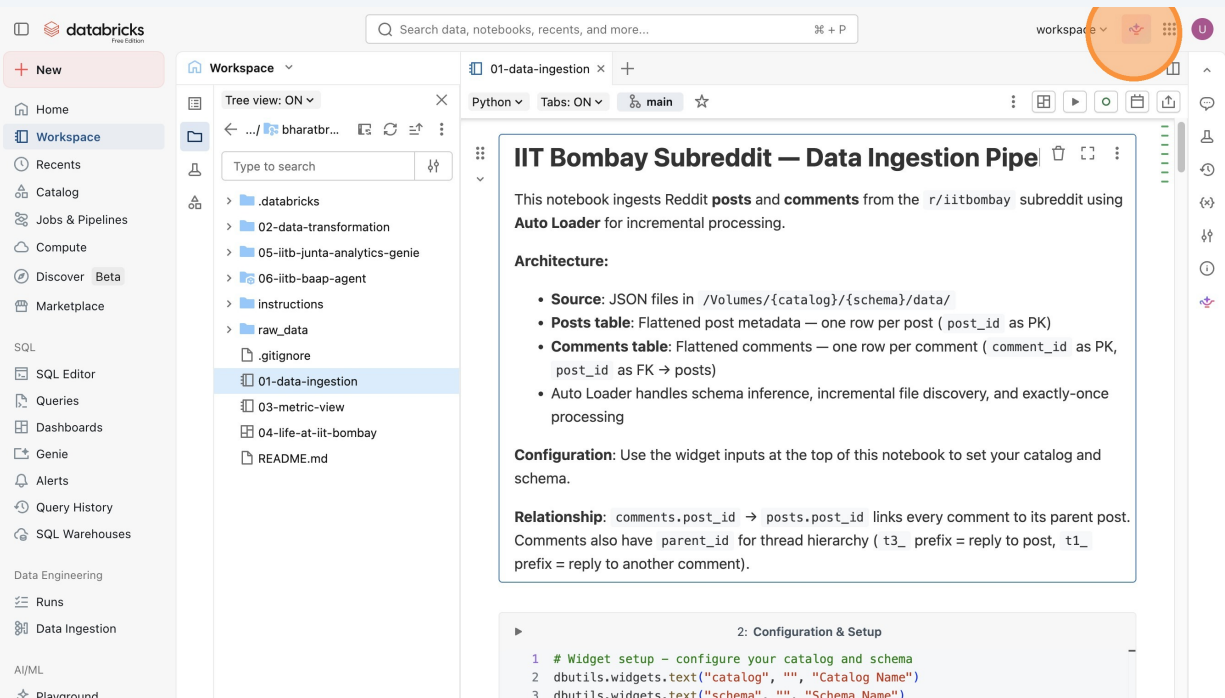

Name	Type	Owner	Created at
Drafts	Folder	user_9501cd52	Mar 28, 2026, 03...
bakehouse	Folder	user_9501cd52	Sep 04, 2025, 10...
bharatbricksiitb	Git folder	user_9501cd52	Apr 10, 2026, 07:...
secrets	File	user_9501cd52	Oct 24, 2025, 08...

3 Click "01-data-ingestion"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Home, Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover (Beta), Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, AI Gateway (Beta), and Experiments. The main area displays the folder 'bharatbricksiitb'. Below the folder name, there's a table of items. The '01-data-ingestion' notebook is highlighted with an orange circle.

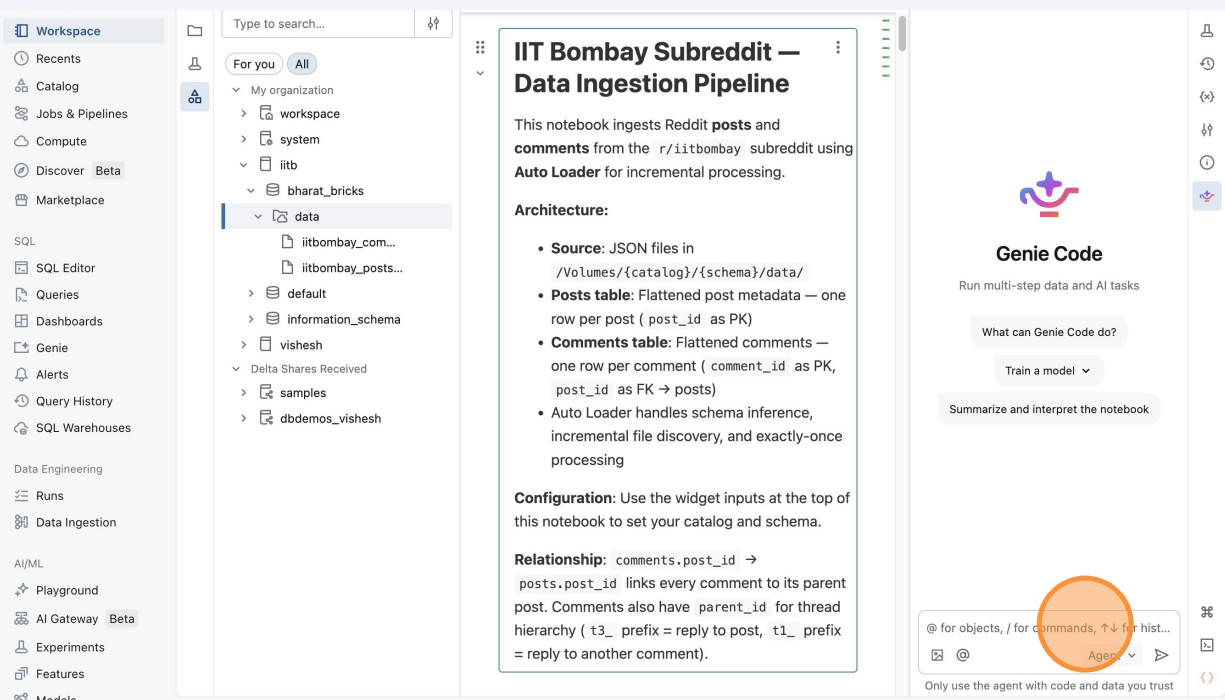

Name	Type	Owner	Created at
.databricks	Folder	user_9501cd52	Apr 10, 2026, 07:...
02-data-transformation	Folder	user_9501cd52	Apr 10, 2026, 07:...
05-iitb-junta-analytics-genie	Folder	user_9501cd52	Apr 10, 2026, 07:...
06-iitb-baap-agent	Folder	user_9501cd52	Apr 10, 2026, 07:...
instructions	Folder	user_9501cd52	Apr 10, 2026, 07:...
raw_data	Folder	user_9501cd52	Apr 10, 2026, 07:...
.gitignore	File	user_9501cd52	Apr 10, 2026, 07:...
01-data-ingestion	Notebook	user_9501cd52	Apr 10, 2026, 07:...
02-metric-view	Notebook	user_9501cd52	Apr 10, 2026, 07:...
04-life-at-iit-bombay	Dashboard	user_9501cd52	Apr 10, 2026, 07:...
README.md	File	user_9501cd52	Apr 10, 2026, 07:...

4 Click this icon.

The screenshot shows the Databricks workspace interface. On the left sidebar, the 'Workspace' section is expanded, and the file tree shows a folder named '01-data-ingestion' selected. The main panel displays the notebook 'IIT Bombay Subreddit — Data Ingestion Pipeline'. The notebook content includes a description, architecture details (Source, Posts table, Comments table, Auto Loader), configuration instructions, and a relationship diagram. The bottom of the notebook shows a code cell titled '2: Configuration & Setup' with Python code for widget setup. An orange circle highlights the 'Run' button (a green play icon) in the top right corner of the notebook header.

5 Click here.

The screenshot shows the Databricks workspace interface. On the left sidebar, the 'Workspace' section is expanded, and the file tree shows a folder named 'data' selected. The main panel displays the notebook 'IIT Bombay Subreddit — Data Ingestion Pipeline'. The notebook content includes a description, architecture details (Source, Posts table, Comments table, Auto Loader), configuration instructions, and a relationship diagram. The bottom of the notebook shows a code cell titled '2: Configuration & Setup' with Python code for widget setup. The right sidebar shows the 'Genie Code' section with a button labeled 'Genie Code' highlighted by an orange circle. Below the button, there are instructions on how to use the agent with code and data.

6

Type "i want to run this data ingestion notebook for my catalog (iitb) and schema (bharat_bricks) **Enter**"

The screenshot shows the Databricks workspace interface. On the left, the 'Workspace' sidebar is visible with a search bar. The search results show a folder named 'iitb' under 'My organization' > 'workspace' > 'system'. Inside 'iitb', there is a folder named 'bharat_bricks' which contains a 'data' folder. The 'data' folder contains two files: 'iitb_bombay_com...' and 'iitb_bombay_posts...'. Below this, there are several other folders and files, including 'default', 'information_schema', 'vishesh', 'Delta Shares Received', 'samples', and 'dbdemos_vishesh'.

In the center, a code cell is shown with the following content:

```
posts.post_id links every comment to its parent
post. Comments also have parent_id for thread
hierarchy ( t3_ prefix = reply to post, t1_ prefix
= reply to another comment).
```

```
1 # Widget setup - configure your catalog
and schema
dbutils.widgets.text("catalog", "", "Catalog Name")
2 dbutils.widgets.text("schema", "iitb",
"Schema Name")
3 dbutils.widgets.text("schema", "bharat_bricks", "Schema Name")
4
5 # Get configuration from widgets
6 catalog = dbutils.widgets.get("catalog")
7 schema = dbutils.widgets.get("schema")
8 source_path = f"/Volumes/{catalog}/{schema}/data"
9 checkpoint_base = f"{source_path}/_checkpoints"
10
11 spark.sql(f"USE CATALOG {catalog}")
12 spark.sql(f"CREATE SCHEMA IF NOT EXISTS {schema}")
13 spark.sql(f"USE SCHEMA {schema}")
14
15 print(f"Target: {catalog}.{schema}")
16 print(f"Source: {source_path}")
17 print(f"Checkpoints: {checkpoint_base}")
```

At the bottom of the code cell, there are buttons for '1/1 asset', 'Reject', and 'Accept'.

On the right, a sidebar shows a list of running jobs. The first job is '01-data-ingestion' with a status of '+2 -2'. Below it, there is a section for 'Running 7 cells' with a list of tasks: 'Configuration & Setup', 'Ingest Posts with Auto Loader', 'Ingest Comments with Auto Loader', 'Enable Change Data Feed', 'Establish PK-FK Constraints', 'Add Table & Column Comments', and 'Verify Ingested Data'. There are buttons for 'Ask every time', 'Skip', and 'Allow'.

7

Click "Always allow in current thread"

This screenshot is identical to the one in step 6, showing the same workspace search results and code cell. However, in the sidebar on the right, a red circle highlights the 'Always allow in current thread' button, which is located below the 'Ask every time' button. This button is used to grant permissions for the current thread.

8 Click "Accept all"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover, Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, AI Gateway, Experiments, and Features. The main area displays a notebook with two code blocks. The first block, titled '7: Add Table & ...', contains SQL and Python code to create and verify tables. The second block, titled '8: Verify Ingest...', contains Python code to verify the ingestion of data. Below the code, a summary shows 'Posts: 1,339 rows' and 'Comments: 16,790 rows'. On the right, a 'Data Ingested' panel shows the ingestion details, including the number of posts and comments, and a 'Pipeline Features Activated' section. At the bottom right, a 'Query the posts table' and 'Query the comments table' section is visible, with the 'Accept all' button highlighted by an orange circle.

9 Click "Posts: 1,339 rows Comments: 16,790 rows Avg comments per post: 12.5 --- Sample Posts ---"

The screenshot shows the Databricks workspace interface. On the left is a sidebar with navigation options like Workspace, Recents, Catalog, Jobs & Pipelines, Compute, Discover, Marketplace, SQL, SQL Editor, Queries, Dashboards, Genie, Alerts, Query History, SQL Warehouses, Data Engineering, Runs, Data Ingestion, AI/ML, Playground, AI Gateway, Experiments, and Features. The main area displays a notebook with two code blocks. The first block, titled '7: Add Table & ...', contains SQL and Python code to create and verify tables. The second block, titled '8: Verify Ingest...', contains Python code to verify the ingestion of data. Below the code, a summary shows 'Posts: 1,339 rows' and 'Comments: 16,790 rows'. On the right, a 'Data Ingested' panel shows the ingestion details, including the number of posts and comments, and a 'Pipeline Features Activated' section. At the bottom right, a 'Query the posts table' and 'Query the comments table' section is visible. The 'Posts: 1,339 rows Comments: 16,790 rows Avg comments per post: 12.5 --- Sample Posts ---' section is highlighted by an orange circle.

10 Click "Catalog"

The screenshot shows the Databricks workspace interface. On the left sidebar, the 'Catalog' option is highlighted with an orange circle. The main panel displays the 'Catalog' view for the 'iitb' catalog and 'bharat_bricks' schema. A table with 5 rows is visible, showing columns for comment_id, post_id, and author. The table is refreshed 1 minute ago. On the right, the 'Genie Code' panel shows the data ingested and pipeline features activated.

Genie Code

Here's what was accomplished:

- Data Ingested:**
 - 1,339 posts from r/iitbmbay → posts
 - 16,790 comments → comments
 - Average of 12.5 comments per post
- Pipeline Features Activated:**
 - Auto Loader configured for incremental JSON processing
 - Primary keys and foreign key constraints established
 - Change Data Feed enabled for downstream incremental reads
 - Comprehensive table and column documentation added (27 post columns, 15 comment columns)

Top Post: "Well that pretty much sums it up." by United_Pineapple_932 with 6,974 upvotes and 165 comments

Your tables are now ready for analysis! The pipeline will automatically process any new JSON files you add to /Volumes/iitb/bharat_bricks/data/ while maintaining exactly-once semantics.

11 Click "Tables(2)"

The screenshot shows the Databricks workspace interface. On the left sidebar, the 'Catalog' option is highlighted with an orange circle. The main panel displays the 'Catalog Explorer' for the 'iitb' catalog and 'bharat_bricks' schema. The 'Tables(2)' option is highlighted with an orange circle. The table view shows columns for Name, Size, and Last modified. The table is refreshed 2 hours ago. On the right, the 'Genie Code' panel shows the data ingested and pipeline features activated.

12 Click "comments"

The screenshot shows the Databricks Catalog Explorer interface. In the left sidebar, the 'Catalog' section is expanded, and the 'comments' table is highlighted. The main panel displays the 'data' volume, showing a list of files: 'iitbomabay_comments.json' (9.51 MB, 2 hours ago) and 'iitbomabay_posts.json' (2.26 MB, 2 hours ago). The right sidebar shows the 'Genie Code' panel, which includes a summary of 16,790 comments and a list of pipeline features activated, such as Auto Loader and Change Data Feed.

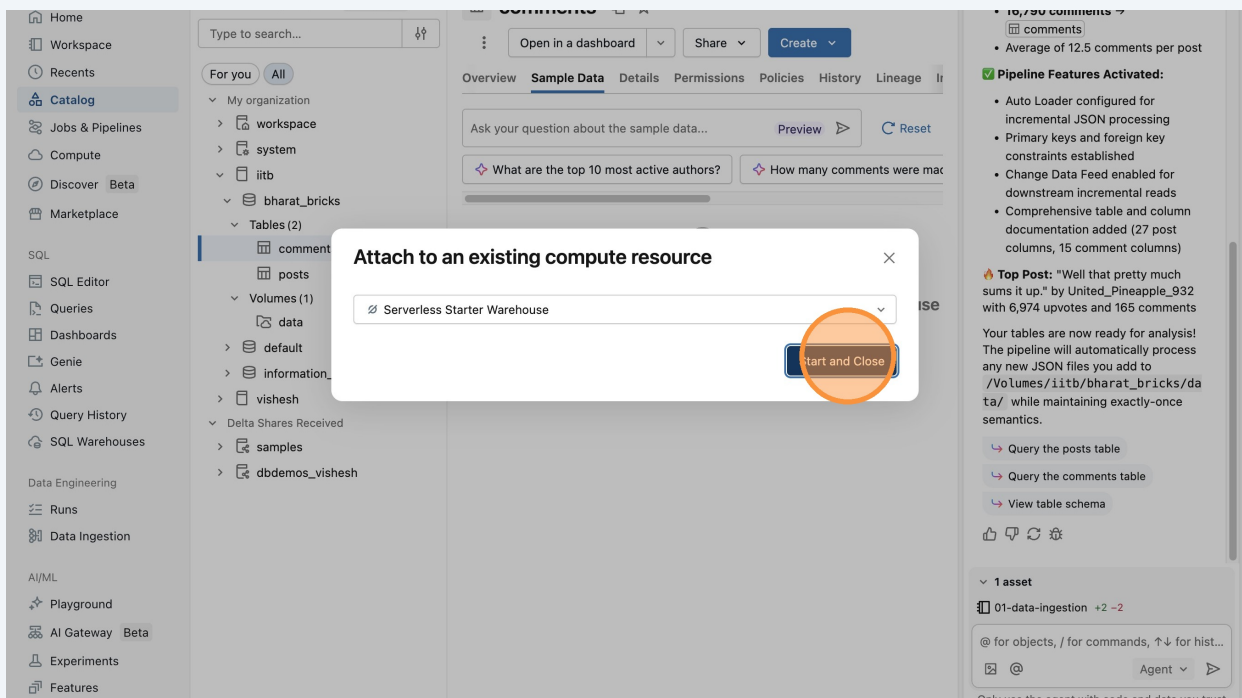

13 Click "Sample Data"

The screenshot shows the Databricks Catalog Explorer interface. In the left sidebar, the 'Catalog' section is expanded, and the 'comments' table is highlighted. The main panel displays the 'Sample Data' tab, showing a table with columns: Column, Type, Comment, Tags, and Column mas. The right sidebar shows the 'Genie Code' panel, which includes a summary of 16,790 comments and a list of pipeline features activated, such as Auto Loader and Change Data Feed.

14 Click "Select compute"

15 Click "Start and Close"

16 Click "Sample Data"

The screenshot shows the Databricks Catalog Explorer interface. On the left, the 'Catalog' sidebar is visible, showing a tree structure of the workspace. The 'comments' table is selected under the 'itb' workspace. In the main panel, the 'Sample Data' tab is highlighted with an orange circle. The table displays a sample of data with columns: comment_id, post_id, parent_id, author, and body. The table has 17 rows of data.
