

Creating Catalogs and Uploading Data in Databricks

Learn how to set up custom catalogs and schemas within your Databricks workspace. This guide also walks you through the process of creating volumes and uploading local files for efficient data management.

1 Click "SQL Editor"

2 Click "SQL Query"

3 Press cmd + c

4 Double-click "your_catalog;"

5 Click "CREATE CATALOG IF NOT EXISTS iitb;CREATE SCHEMA IF NOT EXISTS iitb.bharat_bricks;"

6 Click "Run selected"

7 Click "Catalog"

8 Click "iitb"

The screenshot shows the Databricks Catalog interface. On the left sidebar, the 'Catalog' section is expanded, and the 'iitb' folder is highlighted with an orange circle. The main panel displays a list of suggested tables under the 'Suggested' tab. The tables are listed with their names, reasons for suggestion, and types.

Name	Reason for suggestion	Type
media_customer_reviews samples.bakehouse	Quick start with samples data	Table
sales_customers samples.bakehouse	Quick start with samples data	Table
sales_transactions samples.bakehouse	Quick start with samples data	Table
sales_franchises samples.bakehouse	Quick start with samples data	Table
sales_suppliers samples.bakehouse	Quick start with samples data	Table
media_gold_reviews_chunked samples.bakehouse	Quick start with samples data	Table

9 Click "bharat_bricks"

The screenshot shows the Databricks Catalog Explorer interface for the 'iitb' catalog. On the left sidebar, the 'bharat_bricks' schema is highlighted with an orange circle. The main panel displays the 'Overview' tab for the 'iitb' catalog, showing a description, a list of schemas, and other details.

10 Click "Create"

The screenshot shows the Databricks Catalog Explorer interface. On the left, the 'Catalog' sidebar is visible, showing a tree structure with 'workspace', 'system', 'iitb', and 'bharat_bricks' (selected). The main panel displays the 'bharat_bricks' schema details, including a description, a table list (currently empty), and options to 'AI generate' or 'Add' tables. The 'Create' button in the top right corner is circled in orange.

11 Click "Volume"

The screenshot shows the Databricks Catalog Explorer interface, similar to the previous one. The 'Create' button in the top right corner is circled in orange, and its dropdown menu is open, showing options: 'Volume', 'Table', 'Model', and 'Metric view'. The 'Volume' option is circled in orange.

12 Click the "Volume name*" field.

13 Click "Create"

14 Click "data"

The screenshot shows the Databricks Catalog Explorer interface. On the left, the 'Catalog' sidebar is visible with a search bar and a list of catalogs. The 'bharat_bricks' catalog is selected, and the 'data' directory is highlighted with an orange circle. The main panel shows the 'data' directory details, including a description, a table of files (currently empty), and a section for 'About this volume' and 'Tags'.

15 Click "Upload raw data to /Volumes/your_catalog/bharat_bricks/data/"

The document titled 'Setup' provides instructions for deploying a pipeline and setting up a Genie Space. It includes prerequisites, a deployment pipeline, and a Genie Space setup.

Setup

Prerequisites

- Databricks workspace with Unity Catalog
- SQL warehouse (Pro or Serverless for Genie)
- Python 3.11+ with databricks-sdk

Deploy Pipeline

- Create catalog/schema:

```
CREATE CATALOG IF NOT EXISTS your_catalog;  
CREATE SCHEMA IF NOT EXISTS your_catalog.bharat_bricks;
```
- Upload raw data to /Volumes/your_catalog/bharat_bricks/data/
- Run notebooks in order:
 - 01-data-ingestion.ipynb — creates posts/comments tables
 - 02-data-transformation/ — run SQL files via Databricks SQL
 - 03-metric-view.ipynb — creates metric view
- Import dashboard: Upload 04-life-at-iit-bombay.lvdash.json via Dashboards UI

Deploy Genie Space

```
cd 05-iitb-junta-analytics-genie  
  
# Set target environment  
export TARGET_WAREHOUSE_ID="your_warehouse_id"  
export TARGET_CATALOG="your_catalog"  
export TARGET_SCHEMA="bharat_bricks"
```

16 Click "raw_data"

17 Click "Upload to this volume"

18 Click "browse"

19 Click "Select files"

20

Click "Upload"
